# Table of Contents

- Preface ........................................................................................................ iii
- Committee ..................................................................................................... v
- Sponsors ...................................................................................................... vii
- Keynotes
  - Computation in Memory for Data-Intensive Applications: Beyond CMOS and beyond Von-Neumann .............................. 1
    Said Hamdioui
  - Adaptive Isolation for Predictable MPSoC Stream Processing .................................................. 2
    Jürgen Teich
- Full Papers
  - Programming Strategies for Contextual Runtime Specialization .............................................. 3
    Tiago Carvalho, Pedro Pinto and João Cardoso
  - Static analysis of energy consumption for LLVM IR programs ............................................. 12
    Neville Grech, Kyriakos Georgiou, James Pallister, Steve Kerrison, Jeremy Morse and Kerstin Eder
  - Bytewise Register Allocation ....................................................................................... 22
    Philipp Klaus Krause
  - Utilization Improvement by Enforcing Mutual Exclusive Task Execution in Modal Stream Processing Applications 28
    Guus Kuiper, Stefan J. Geuns and Marco J.G. Bekooij
  - Efficient Compilation of Stream Programs for Heterogeneous Architectures: A Model-Checking based approach 38
    Rajesh Thakur and Y.N. Srikant
  - Plasmon-based Virus Detection on Heterogeneous Embedded Systems .................................. 48
    Olaf Neugebauer, Pascal Libuschewski, Michael Engel, Heinrich Mueller and Peter Marwedel
  - Use of Previously Acquired Positioning of Optimizations for Phase Ordering Exploration ........... 58
    Ricardo Nobre, Luiz Martins and João Cardoso
  - Throughput-optimizing Compilation of Dataflow Applications for Multi-Cores using Quasi-Static Scheduling .......... 68
    Tobias Schwarz, Joachim Falk, Michael Glaß, Jürgen Teich, Christian Zebelein and Christian Haubelt
- Research Presentations
  - A Toolflow for Parallelization of Embedded Software in Multicore DSP Platforms ...................... 76
    Miguel Angel Aguilar, Rainer Leupers, Gerd Ascheid and Nikolaos Kavvadias
  - Is dynamic compilation possible for embedded systems ? .................................................... 80
    Henri-Pierre Charles and Victor Lomüller
  - Application-Specific Architecture Exploration Based on Processor-Agnostic Performance Estimation .................. 84
    Juan Fernando Eusse, Luis Gabriel Murillo, Christopher McGirr, Rainer Leupers and Gerd Ascheid
  - A model-based, single-source approach to design-space exploration and synthesis of mixed-criticality systems (Extended Abstract) ................................................................. 88
    F. Herrera, P. Peïil and E. Villar
  - A Concept of Vector Clock Utilization in an Iterative Tracing Approach for Distributed Embedded Systems 92
    Robert Hoettger and Burkhard Igel
  - High-level software-pipelining in LLVM ............................................................................. 97
    Roel Jordans and Henk Corporaal
  - Schedulability Aware WCET-Optimization of Periodic Preemptive Hard Real-Time Multitasking Systems 101
    Arno Luppoloid and Heiko Falk
    Nicolas Melot, Christoph Kessler, Jörg Keller and Patrick Eitschberger
  - Modular translation validation of a full-sized synchronous compiler using off-the-shelf verification tools (abstract) ............................................................................................. 109
    Van-Chan Ngo, Jean-Pierre Talpin, Thierry Gautier, Loïc Besnard and Paul Le Guernic
  - An Energy Efficient Message Passing Synchronization Algorithm for Concurrent Data Structures in Embedded Systems ........................................................................................................ 113
    Lazaros Papadopoulos and Dimitrios Soudris
• VLIW Code Generation for a Convolutional Network Accelerator .................................................. 117
  Maurice Peemen, Wisnu Pramadi, Bart Mesman and Henk Corporaal

• Runtime Adaptation of Application Execution under Thermal and Power Constraints in Massively Parallel
  Processor Arrays .................................................................................................................. 121
  Éricles Sousa, Frank Hannig, Jürgen Teich, Qingqing Chen and Ulf Schlichtmann

• A framework for optimizing OpenVX applications performance on embedded manycore accelerators ........ 125
  Giuseppe Tagliavini, Germain Haugou, Andrea Marongiu and Luca Benini

• Modeling Exclusive Memory Access for a Time-Decoupled Parallel SystemC Simulator ...................... 129
  Jan Henrik Weinstock, Rainer Leupers and Gerd Ascheid

• Synchronous Reactive Nano-Kernels: Exploring the Limits of Power and Energy Efficiency in Embedded
  Systems ..................................................................................................................................... 133
  Bartosz Ziółek, Mariusz Ryndzionek, Zbigniew Chamski and Piotr Romaniuk
Preface

Dear Colleague,

Welcome to Sankt Goar and the SCOPES workshop. This year we are presenting a workshop program that features many interesting talks on all aspects related to the design of modern embedded systems. I hope that you will find our program interesting, stimulating and exciting.

The influence of embedded systems is constantly growing. Increasingly powerful and versatile devices are developed and put on the market at a fast pace. Their functionality and number of features is increasing, and so are the constraints on the systems concerning size, performance, energy dissipation and timing predictability. To meet all these constraints, multi-processor systems on a chip (MPSoCs) are becoming popular in embedded systems. In order to meet the performance and energy constraints of embedded applications, heterogeneous architectures incorporating functional units optimized for specific functions are commonly employed. This technological trend has dramatic consequences on the parallelization, mapping, compiler and design technology used to develop these systems. The SCOPES workshop focuses on the software generation process for these modern embedded systems. Topics of interest include all aspects of the compilation and mapping process of embedded single and multi-processor systems.

SCOPES received a total of 18 research papers coming from many different countries in Europe, North-America, Asia, Middle-East, Africa, and Australia. Each paper has been reviewed by at least three independent reviewers to ensure the quality of the workshop. Each reviewer provided a score together with detailed comments and suggestions on how to improve the overall quality of each paper. After an on-line meeting, the program committee has decided to accept 8 papers out of these 18 submissions. This gives an acceptance rate of 44% which is similar to earlier editions of the SCOPES workshop. It also reflects our commitment to only select high quality papers for presentation at our workshop.

In addition to the research papers, the workshop features also 18 research presentations. The idea of research presentations was previously used at the Map2MPSoC workshop. After the merger of SCOPES and Map2MPSoC this idea has been continued in the SCOPES workshop program. Research presentations show research results relevant to the topics addressed by the workshop. These presentations may be based on on-going work or research results that have previously been presented in other forums. Research presentations may include a short publication in the SCOPES proceedings. Therefore all submitted presentations have undergone a light review.

In conclusion, I would like to thank the members of the program committee and the external reviewers for their contribution to the quality of this workshop. I would also like to thank all authors for choosing SCOPES as the workshop where to report your research and your contributions to the scientific community. Finally, I would like to thank our sponsors for their support to SCOPES 2015. I wish all of you a fruitful conference and a pleasant stay in Sankt Goar.
