Table of Contents

- Preface iii
- Committee v
- Sponsors vii
- **Keynotes**
- Embedded On-Chip Reliability - It's a Thermal Challenge 1
  Jörg Henkel
- OpenStream: a Data-flow Approach to Solving the Von Neumann Bottlenecks 2
  Antoniu Pop
- **Full papers**
- Cyclo-Static DataFlow Phases Scheduling Optimization for Buffer Sizes Minimization 3
  Mohamed Benazouz and Alix Munier-Kordon
- Dataflow Analysis for Multiprocessor Systems with Non-Starvation-Free Schedulers 13
  Joost P.H.M. Hausmans, Stefan J. Geuns, Maarten H. Wiggers and Marco J.G. Bekooij
- Optimal Placement of Bank Selection Instructions in Polynomial Time 23
  Philipp Klaus Krause
- Solving the Simple Offset Assignment Problem as a Traveling Salesman 31
  Michael Juenger and Sven Mallach
- Designer-in-the-Loop Recoding of ESL Models using Static Parallel Access Conflict Analysis 40
  Xu Han, Weiwei Chen and Rainer Doemer
- Reducing Startup Time of a Deterministic Virtualizing Runtime Environment 48
  Martin Däumler and Matthias Werner
- Design of Safety-Critical Java Level 1 Applications Using Affine Abstract Clocks 58
  Adnan Bouakaz and Jean-Pierre Talpin
- On the Dictionary Compression for Java Card Environment 68
  Massimiliano Zilli, Wolfgang Raschke, Johannes Loinig, Reinhold Weiss and Christian Steger
- NoC Simulation in Heterogeneous Architectures for PGAS Programming Model 77
  Sascha Roloff, Andreas Weichslgartner, Jan Heißwolf, Frank Hannig and Jürgen Teich
- **Research presentations**
- GPU-CC: a Reconfigurable GPU Architecture with Communicating Cores 86
  Gert-Jan van den Braak and Henk Corporaal
- Generating Hardware Specific Code at Different Abstractions Levels using Averest 90
  Omair Rafique, Manuel Gesell, Klaus Schneider
- Constraint-based Code Generation 93
  Roberto Castañeda Lozano, Gabriel Hjort Blindell, Mats Carlsson, Frej Drejhammar, Christian Schulte
- Runtime Resource Allocation for Software Pipelines 96
  Janmartin Jahn, Sebastian Kobbe, Santiago Pagani, Jian-Jia Chen, Jörg Henkel

Preface

Dear Colleague,

Welcome to Sankt Goar and the M-SCOPES workshop. After having been co-located for five years, the workshop on Mapping of Applications to MPSoCs (Map2MPSoC) and the workshop on Software and Compilers for Embedded Systems (SCOPES) have merged into M-SCOPES. This year we are presenting a workshop program that features many interesting talks on all aspects related to the design of modern embedded systems. I hope that you will find our program interesting, stimulating and exciting.

The influence of embedded systems is constantly growing. Increasingly powerful and versatile devices are developed and put on the market at a fast pace. Their functionality and number of features is increasing, and so are the constraints on the systems concerning size, performance, energy dissipation and timing predictability. To meet all these constraints, multi-processor systems on a chip (MPSoCs) are becoming popular in embedded systems. In order to meet the performance and energy constraints of embedded applications, heterogeneous architectures incorporating functional units optimized for specific functions are commonly employed. This technological trend has dramatic consequences on the parallelization, mapping, compiler and design technology used to develop these systems. The M-SCOPES workshop focuses on the software generation process for these modern embedded systems. Topics of interest include all aspects of the compilation and mapping process of embedded single and multi-processor systems.

M-SCOPES received a total of 16 papers coming from many different countries in Europe, North-America, Asia, Middle-East and Africa. Each paper has been reviewed by at least four independent reviewers to ensure the quality of the workshop. Each reviewer provided a score together with detailed comments and suggestions on how to improve the overall quality of each paper. After an on-line meeting, the program committee has decided to accept 9 papers out of these 16 submissions. This gives an acceptance rate of 56% which is slightly above earlier editions of the M-SCOPES workshop. It also reflects our commitment to only select high quality papers for presentation at our workshop.

In addition to the research papers, the workshop features also 5 research presentations. The idea of research presentations was previously used at the Map2MPSoC workshop and has been continued in the M-SCOPES workshop program. Research presentations show research results relevant to the topics addressed by the workshop. These presentations may be based on on-going work or research results that have previously been presented in other forums. Research presentations may include a short publication in the M-SCOPES proceedings. Therefore all submitted presentations have undergone a light review.

In conclusion, I would like to thank the members of the program committee and the external reviewers for their contribution to the quality of this workshop. I would also like to thank all authors for choosing M-SCOPES as the workshop where to report your research and your contributions to the scientific community. Finally, I would like to thank our sponsors for their support to M-SCOPES 2013. I wish all of you a fruitful conference and a pleasant stay in Sankt Goar.
