Table of Contents

• Preface	iii
• Committee	v
• Sponsors	vii
• Full Papers	
• Exploiting Specification Modularity to Prune the Optimization-Space of Manufacturing Systems	1
<i>Joao Bastos, Jeroen Voeten, Sander Stuijk, Ramon Schiffelers and Henk Corporaal</i>	
• Reinforcement Learning for Power-Efficient Grant Prediction in LTE	18
<i>Peter Brand, Joachim Falk, Jonathan Ah Sue, Johannes Brendel, Ralph Hasholzner and Jürgen Teich</i>	
• Less is More: Exploiting the Standard Compiler Optimization Levels for Better Performance and Energy Consumption	35
<i>Kyriakos Georgiou, Craig Blackmore, Samuel Xavier de Souza and Kerstin Eder</i>	
• Fast and Portable Vector DSP Simulation Through Automatic Vectorization	47
<i>Jumana Mundichipparakkal, Mohamed Bamakhrama and Roel Jordans</i>	
• Control Flow Vectorization for ARM NEON	66
<i>Angela Pohl, Nicolás Morini, Biagio Cosenza and Ben Juurlink</i>	
• Automatic Kernel Fusion for Image Processing DSLs	76
<i>Bo Qiao, Oliver Reiche, Frank Hannig and Jürgen Teich</i>	
• Automatic Optimization of Redundant Message Routings in Automotive Networks	90
<i>Fedor Smirnov, Felix Reimann, Jürgen Teich, Zhao Han and Michael Gläß</i>	
• Research Presentations	
• Optimizing Worst-Case Execution Times Using Mainstream Compilers	10
<i>Martin Becker and Samarjit Chakraborty</i>	
• Towards a verified Lustre compiler with modular reset	14
<i>Timothy Bourke, Léo Brun and Marc Pouzet</i>	
• Restricted Scheduling Windows for Dynamic Fault-Tolerant Primary/Backup Approach-Based Scheduling on Embedded Systems	27
<i>Petr Dobias, Emmanuel Casseau and Oliver Sinnen</i>	
• On the Cost of Freedom From Interference in Heterogeneous SoCs	31
<i>Bjoern Forsberg, Luca Benini and Andrea Marongiu</i>	
• stdcbench - A Benchmark for Small Systems	43
<i>Philipp Klaus Krause</i>	
• Multi-Criteria Compiler-Based Optimization of Hard Real-Time Systems	54
<i>Kateryna Muts, Arno Luppold and Heiko Falk</i>	
• Mitigating Data Cache Aging through Compiler-Driven Memory Allocation	58
<i>Dominic Oehlert, Arno Luppold and Heiko Falk</i>	
• Measuring and Modeling Energy Consumption of Embedded Systems for Optimizing Compilers	86
<i>Mikko Roth, Arno Luppold and Heiko Falk</i>	
• Interrelations between Software Quality Metrics, Performance and Energy Consumption in Embedded Applications	62
<i>Lazaros Papadopoulos, Charalampos Marantos, Georgios Digkas, Apostolos Ampatzoglou, Alexander Chatzigeorgiou and Dimitrios Soudris</i>	
• Toward Efficient Many-Core Scheduling Using Partial Expansion Graphs	100
<i>Hai Nam Tran, Shuvra S. Bhattacharyya, Jean-Pierre Talpin Talpin and Thierry Gautier</i>	
• MASES: Mobility And Slack Enhanced Scheduling For Latency-Optimized Pipelined Dataflow Graphs	104
<i>Wenxiao Yu, Jacob Kornerup and Andreas Gerstlauer</i>	

Preface

Dear Colleague,

Welcome to Sankt Goar and the SCOPES workshop. This year we are presenting a workshop program that features many interesting talks on all aspects related to the design of modern embedded systems. I hope that you will find our program interesting, stimulating and exciting.

The influence of embedded systems is constantly growing. Increasingly powerful and versatile devices are developed and put on the market at a fast pace. Their functionality and number of features is increasing, and so are the constraints on the systems concerning size, performance, energy dissipation and timing predictability. To meet all these constraints, multi-processor systems on a chip (MPSoCs) are becoming popular in embedded systems. In order to meet the performance and energy constraints of embedded applications, heterogeneous architectures incorporating functional units optimized for specific functions are commonly employed. This technological trend has dramatic consequences on the parallelization, mapping, compiler and design technology used to develop these systems. The SCOPES workshop focuses on the software generation process for these modern embedded systems. Topics of interest include all aspects of the compilation and mapping process of embedded single and multi-processor systems.

SCOPES received a total of 18 research papers coming from many different countries in Europe, North-America, Asia, Middle-East, Africa, and Australia. Each paper has been reviewed by at least three independent reviewers to ensure the quality of the workshop. Each reviewer provided a score together with detailed comments and suggestions on how to improve the overall quality of each paper. After an on-line meeting, the program committee has decided to accept 7 papers out of these 18 submissions. This gives an acceptance rate of 39% which is similar to earlier editions of the SCOPES workshop. It also reflects our commitment to only select high quality papers for presentation at our workshop.

In addition to the research papers, the workshop features also 13 research presentations. The idea of research presentations was previously used at the Map2MPSoC workshop. After the merger of SCOPES and Map2MPSoC this idea has been continued in the SCOPES workshop program. Research presentations show research results relevant to the topics addressed by the workshop. These presentations may be based on on-going work or research results that have previously been presented in other forums. Research presentations may include a short publication in the SCOPES proceedings. Therefore all submitted presentations have undergone a light review.

In conclusion, I would like to thank the members of the program committee and the external reviewers for their contribution to the quality of this workshop. I would also like to thank all authors for choosing SCOPES as the workshop where to report your research and your contributions to the scientific community. Finally, I would like to thank our sponsors for their support to SCOPES 2018. I wish all of you a fruitful conference and a pleasant stay in Sankt Goar.
